

Meet My Special Aflac Duck®

A cuddly, comforting companion for kids with cancer and sickle cell, offered free of charge. My Special Aflac Duck is Aflac's promise that you are not alone.

My Special Aflac Duck is a social robot that offers a sense of comfort, joy and control to children undergoing cancer treatment and children living with sickle cell. My Special Aflac Duck was designed hand-in-hand with more than 100 children, families and medical professionals. In 2018, Aflac debuted My Special Aflac Duck as part of its 26-year, \$154+ million commitment to childhood cancer and blood disorders, including sickle cell disease. Since then, Aflac has distributed more than 12,000 My Special Aflac Ducks to more than 300 hospitals and childhood cancer associations. In 2021, Aflac introduced a CLS Care Kit to support child life specialists in using the duck with their patients. A customized My Special Aflac Duck with physical accessories and app experiences designed especially for patients with sickle cell joins the Aflac family in 2022.

Lifelike Motion

Kids can enjoy lifelike interactions with the duck's realistic expressions. The duck nuzzles when petted, calms when the lights are low, and has a comforting heartbeat and purring vibration.

Emotion Expression

It's not always easy for kids to communicate how they're feeling. Kids can tap one of seven feeling cards to the duck's chest, and the duck will embody and express that emotion!

Medical Play

Kids can mirror the treatment they are receiving with medical play accessories, including a stethoscope, thermometer, pulse oximeter, syringe and a port-a-cath or IV accessory.

Soothing Soundscapes™

Kids can tap the Spacechip to the duck's chest to play calming Soundscapes from an ocean, forest and more.

Additional Features

- Toteback for easy carrying.
- Removable, washable fur.
- Easy Power On button.
- "Mute" mode for quiet time.
- Batteries included.

Request Ducks For Your Patients At No Cost

Authorized professionals can request the duck directly online for their pediatric oncology or sickle cell patients (ages 3+) — there's never a charge.

Ducks can be reordered as often as needed so each and every patient has their own duck to take home. Short on space? Request ducks only when you need them — delivery is typically prompt. The process is made even simpler when you sign up to receive monthly email reminders.

Request your ducks and learn more at myspecialaflacduck.com.
